

**Predavač:** Metka Zorič Venuti, University of Maribor

**Naziv rada:** Moodle UM at the University of Maribor

**Sažetak:**

At the University of Maribor (UM), Slovenia, there are about 15.000 students that study at one of the 17 faculties. As a learning management system (LMS), the central installation of Moodle is used. Moodle is part of the integrated UM's information system, among which are:

- identity and access management system (IAM),
- student information system (SIS) and
- human resources information system (HR).

In the presentation, we'll show you:

- Moodle set-up with an automatic data synchronization system between IAM, SIS and HR,
- the specifics of the solution for the new academic year problem,
- organizational approaches related to updating user data, installing non-standard plugins and providing additional functionalities.

The presentation will also discuss some issues we are dealing with, statistical data on the use of Moodle and forms of cooperation/user participation in determining the direction of development of Moodle at the UM.
