professional training for systems engineers

lifelong learning
we provide it

national electronic data analysis repository and internet traffic exchange points

information systems in science and higher education

we support digital curation
aggregation
archive metadata

identity federation

open access

advanced computing
establishing connections to European research e-infrastructure

science
we build e-infrastructure
institutions

citizens

IT experts

researchers

teachers

students

free courses

exam registration
e-learning

Internet access:
wired and wireless

student ID card

virtual classrooms and labs

studying

we make it easier

student rights

computer clusters

Croatian scientific and educational cloud
grid - distributed computing environment
e-infrastructure and data safety

computing
we make it faster

virtual private servers
cloud services
(clusters and grid)
